

# Elevvo Internship Instructions

## Participation Requirements

- If you're enrolled in the 1-month format, you must complete at least 4 tasks of your choice.
- If you're enrolled in the 2-week format, the minimum is 3 tasks.
- The tasks are designed to reflect real-world projects and cover the most in-demand tools and skills used in the industry.
- You're free to choose the tasks that interest you most.

## Optional Excellence Badge

Completing additional tasks beyond the required number, including bonus tasks, increases your chance of receiving the “Outstanding Contributor” badge — a mark of excellence awarded to top participants.

## Materials & Tools

- The materials are hosted on Google Drive. You'll find the access link in the attached materials.txt file.

# Elevvo Internship Instructions

- The provided materials serve as a reference, but not all tasks are covered within them.
- For ML / NLP / Data Analytics tracks, it is recommended to use the datasets specified in the tasks, or similar publicly available alternatives.
- Bonus tasks are not mandatory, but they will be considered during evaluation for the badge.

## Deadlines & Delivery

- You must submit your completed tasks before your program deadline (based on your selected format: 1 month or 2 weeks).
- Once you've completed your tasks, you must submit them using the official form:

<https://docs.google.com/forms/d/e/1FAIpQLScuj8StEjpy5nzh60BTR7VkZxBaTtIaIp-M833pjQmXsEdyfA/viewform?usp=header>

### Submission Deadlines:

- 2-week internship: August 20 at 11:59 PM
- 1-month internship: September 5 at 11:59 PM

You can confirm your internship duration from the offer letter attached to this email.

## Boost Your Portfolio

Once you've completed your minimum required tasks, it is mandatory to post your work on LinkedIn, tagging the Elevvo page.

This public post:

- Helps you showcase your work professionally
- Increases your visibility
- Acts as a strong portfolio piece for future employers

In the LinkedIn post, please include:

1. A GitHub repository containing your code  
or  
A Google Drive link with your project files (make sure that the shared folder is set to “Anyone with the link can view”)
2. A brief description of your work or a short screen recording showcasing your task

You're welcome to either share your work after each completed task or compile everything into a single LinkedIn post at the end — both options are perfectly fine.

After completing the required tasks and sharing your work on LinkedIn, you'll receive your certificate to acknowledge your effort and progress.
